PROFILE

Systems and IT infrastructure specialist with experience spanning operational roles since 2019. Works across networking, Linux and Windows systems, VMware, VoIP, Odoo ERP, databases, and support automation. Known for tracing problems across layers, finding root causes, and translating operational needs into systems that are stable and practical to maintain.

~500	200+	20+	6-7
users in largest ERP environment	hosted call-center environments	Linux and Windows servers	complex daily support cases

EXPERIENCE

APR 2024 - OCT 2025

ERP SOLUTIONS PROVIDER / ANONYMIZED

Software Support & Odoo Specialist

Owned support, customization, and user guidance across multiple Odoo customer environments.

- Customized Inventory, Sales, Purchase, Accounting, CRM, forms, reports, automations, and access controls using Odoo Studio.
- Designed a two-stage warehouse transfer approval without the custom module initially expected.
- Supported deployments from small teams to a business-critical environment of approximately 500 users while handling 6-7 complex cases per day.

ODOO 15/17 / ODOO STUDIO / SQL / ERP SUPPORT

JUN 2023 - MAR 2024

FINANCIAL SOFTWARE PROVIDER / ANONYMIZED

Technical Support Specialist

Diagnosed financial software, Windows, and SQL Server issues across customer environments.

- Used database queries and structured cross-layer troubleshooting to pursue durable fixes.
- Automated repetitive workstation setup with Windows Batch and Registry files, reducing manual work for the support team.

SQL SERVER / WINDOWS / BATCH / REGISTRY

JAN 2020 - JUL 2021

CLOUD COMMUNICATIONS PROVIDER / ANONYMIZED

VoIP & Network Support Specialist

Maintained the infrastructure behind a hosted call-center platform and supported business VoIP deployments.

- Supported more than 20 Linux and Windows servers and over 200 customer environments on VMware.
- Configured Asterisk, Issabel, SIP trunks, IVR, call queues, and Grandstream equipment.
- Traced network and voice issues across MikroTik, Cisco, VMware, and telephony layers.

ASTERISK / ISSABEL / VMWARE / MIKROTIK / CISCO

IT Helpdesk

Supported users across Windows systems, hardware, software, and network connectivity.

- ♦ Diagnosed issues from individual workstations through shared infrastructure services.
- ♦ Assisted with system installation, configuration, and maintenance.

WINDOWS / NETWORKING / IT SUPPORT

SELECTED INFRASTRUCTURE WORK

ERP OPERATIONS

Two-stage warehouse approval in Odoo Studio

Delivered sender/receiver controls without a custom module in an environment portfolio that included approximately 500 users.

VOICE PLATFORM

Cloud call-center infrastructure

Supported VMware and Asterisk infrastructure serving more than 200 isolated customer environments.

VIRTUALIZATION

Physical-to-virtual consolidation

Consolidated workloads from approximately six physical servers into around eight VMware ESXi virtual machines.

TECHNICAL CAPABILITIES

SYSTEMS

Linux, Windows Server, VMware ESXi, Docker, virtual machines, system administration

NETWORK

MikroTik, Cisco, VLAN, NAT, firewall, VPN, LAN/WAN, troubleshooting

VOICE

Asterisk, Issabel, SIP, IVR, call queues, Grandstream, FXO/FXS

ERP

Odoo 15/17, Odoo Studio, CRM, Inventory, Sales, Purchase, Accounting, access control

TOOLS

SQL Server, SQL, Git, Batch, Registry, REST APIs, AI-assisted development

INDEPENDENT PROJECTS

- ♦ **VideoNest** - Self-hosted video library using Go, React, TypeScript, SQLite, FFmpeg, Docker, and Nginx.
github.com/mahdim43/videonest-go
- ♦ **Idea Expander** - Bilingual, collaborative AI workflow for structured ideation, ranking, and red-team review.
